

Let's be honest. The PS3 was not the best gaming console of its time, and it is definitely not what most people think of when they hear the words "next-gen". However, there are some gems on this console that you might have missed. One of these gems is FNaF World, a challenging side-scrolling RPG with an interesting story to tell. If you are looking for something new to try out on your PS3 or Vita, then get Flipnote studio on android! The free application allows you to use your smartphone or tablet as a gamepad while taking pictures of yourself drawing the scene in front of you. It is a lot of fun to use, and you can make your own gamepad application for other games like Pong or Tetris. The game is not story-driven. It has only 16 levels, all unlocked from the start, and you can choose to play them in any order. Each level has three worlds, which are also unlocked straight away. The different worlds are divided into four classes: Light World (Story), Dark World (Mission), Toy World (Boss) and Free Game (Chapter). The points you earn can be used to unlock new characters or gameplay modes. You will need to unlock the rest of the levels by completing the content in each one, plus some extra missions after finishing Story mode for each world type. As for the gameplay, it is quite simple. The goal is to reach the end of each level as fast as you can. You can earn multipliers by reaching the other side quickly and other bonuses for killing enemies and collecting coins. The enemies give you EXP and coins, and you can choose to spend these points to upgrade your stats or use them in shops to buy new characters and items. The items allow you to do things like increase your speed, jump higher...etc. The soundtrack is chilling, which is nice since most indie games have forgettable music these days. The art style is simple but satisfactory. The voice acting is really well done, and all the characters have a unique feel to them. In addition, there is a multiplayer mode that allows you to play with up to four people online. It is surprisingly stable and works great with both 2DS and 3DS. In summary, the only downside is the SD card usage for saving missions. But I think it can be forgiven since there are not that many levels, anyway.
